

Balloon Quality Is Important!

It is important to use only high-quality balloons when operating Balloon Buster. LAI Games recommends using Sempertex 12" Latex balloons available from your LAI Games office.

Low-quality balloons can deflate very quickly or even pop by themselves because they are often thin, not uniformly manufactured, or are made of inferior materials which allows air to quickly escape. Sempertex balloons are thick, 100% latex and are quality tested to high standards, so they remain inflated for very long periods. LAI Games has done many long term tests with balloons and has noted very marginal deflation in Sempertex balloons even after 2 months!
